Ag Innovation of the Year 2010, Farm and Ranch Show**

# Retracting Swing Auger

Retracts nine feet to allow hopper bottom trailer to drive into place easily.

Extends quickly and safely once the trailer is stopped. Both hoppers can be easily reached without moving the trailer. The retract, swing and tilt controls are conveniently located at the hopper.

Grain should be flowing into hopper within **30 seconds** of leaving the truck seat.

<b>Xtend Swing Auger Specifications</b>				
Retracting Auger	10"	13"	13X"	16X"
Full Stroke	9'	9'	9'	9'
Working Stroke	15"	20"	22"	24"

All models have been designed for durability and long life. All models are mechanical drive and have multiple hopper feedscrews. We use heavy duty construction and most specifications match or exceed the mating auger specs. We use quality components, no pressed bearing flanges and all augers are powder coated.

**3-Way Control at the hopper**

**Super Lug 16" Traction Tires**

**21- Spline Mechanical Drive Connection**

**High Capacity, low profile triple screw hopper, 1 Left Hand**

**Wheatheart is a trademark of AGI**
